as their religion many things that are not true.

There is only one truth about any subject although there may be many erroneous beliefs about it. This is true of religious subjects as well as others. If one believes erroneously as to what is the law he will not be a safe lawyer, nor will he be an efficient engineer if his beliefs concerning the rules of mathematics are faulty. In each case erroneous beliefs must be displaced by positive knowledge before correct results can be attained.

Every one will recognize not only the desirability but the necessity of exchanging false and erroneous beliefs about religious matters for positive truth. In no other way can he grow spiritually. Spiritual truth and the truth about spiritual things, but as long as one believes erroneously about spiritual things he is on a false track and his erroneous beliefs will deprive him of the benefits that would otherwise come to him through a correct understanding of the truth. Likewise, if one wraps around himself the robes of self-satisfaction, and maintains that there is no spiritual truth outside his own beliefs, he is not likely to progress. He should remember that Jesus proved that there is enough spiritual truth in existence that can be taught to and understood by human beings to enable them to heal the sick and raise the dead, and no one should be satisfied until he has attained to this understanding and demonstration.

True religion consists of spiritual truth, and not of erroneous beliefs. Hence it follows that one's religion is limited to the amount of spiritual truth he knows, and that erroneous religious beliefs are only so many delusions that serve no other purpose than to obstruct spiritual growth.

Moreover it is plain that since religion in its true sense is spiritual truth it necessarily follows that real religion and real science are one and the same, for truth whenever and wherever found is capable of proof by demonstration. Hence the term, Christian Science, is perfectly correct, for it is a statement of the spiritual truth composing the Christian religion, and, as such, it may be proved by demonstration in healing sickness and destroying sin.

What Christian Science Seeks to Accomplish.

Christian Science aims to destroy erroneous religious beliefs by substituting a knowledge of truth in place thereof, and to destroy out of the human mind all evil qualities by planting good qualities in their stead. It wages relentless warfare against all wrong mental qualities. It seeks to substitute love in place of hate, unselfishness in place of selfishness, honesty in place of dishonesty, and truth in place of error. It lays its emphasis upon the necessity for "bringing into captivity every thought to the obedience of Christ." (II. Cor. 10:5) and the commandment. It shows that the cause of all disease and sin is mental, and not physical, and that both sickness and sin are destroyed by the evangelization of the human mentality with truth and love. It teaches without any reservation whatever that the mind which is practiced by Jesus, when understood and applied, is sufficient without drugs or any material means to heal the sick and regenerate the sinner, and Christian Scientists everywhere are engaged daily in demonstrating and proving this to be true.

Every student of religion should begin to give heed to what the Bible teaches concerning the importance of looking to the mental rather than to the physical for deliverance from human discord. We read in Romans viii. 6, 7, "The carnal mind is enmity against God; it is not subject to the law of God, neither, indeed, can be." Again in Philippians ii. 5 it is said, "Let this mind be in you which was also in Christ Jesus;" and in Romans xii. 2, "Be ye transformed by the renewing of your mind."

These significant statements from the scriptures leave no room for doubt as to the cause of sin, disease, and death, or their cure. The carnal mind is nothing more nor less than the unregenerated human mind. It is the human mind in its natural state, when filled with hate, selfishness, dishonesty, and other evil qualities, and with superstition and false beliefs. These evil and erroneous mental qualities result in a state of disease, and in all human discord.

The command is to get rid of erroneous mental qualities, and to have in us the mind which was also in Christ Jesus; for in his mind there was not a single sinful quality, nor any subject to the law of God, neither, indeed, can be. Thus the human mind is renewed by the destruction of erroneous and sinful mental qualities, and the substitution in their place of qualities that inhere in the mind of the Master.

As this renewing process goes on, sickness, suffering, and discordant conditions begin to disappear, and when it is finished, and every mortal thought is brought into subjection to Christ, then man will be transformed from a sinning, suffering mortal into a state of peace and harmony. The carnal mind with its sin and superstition produces the conditions that lead to death, while to be spiritual is to have the mind that was in Christ, "Jesus is life and peace." Christian Science teaches that this is the precise process by which human beings are saved from sickness and sin.

It will thus be seen that Christian Science healing in every case is spiritual, and the operation of truth or divine principle in human consciousness, and not from the action of any material substance, nor from human will, nor from hypnotism, nor from mental suggestion.

To summarize the matter in a single sentence, it can be said that Christian Science healing is accomplished through the activity of right thinking in the mind, in no other way can one demonstrate the principle that heals.

Mrs. Eddy's Discovery of Christian Science.

Mrs. Eddy is acknowledged to be the discoverer and founder of Christian Science, and many people ask what it is that she has discovered. In reply it can be said that she has discovered the law of spirit which is spiritual truth.

Spiritual Law.

Mrs. Eddy discovered the law of spirit as truly as Sir Isaac Newton discovered the law of gravitation, and this she did as thoroughly understood. Just as Newton discovered that the movements of material bodies were regulated and governed by this material law, so Mrs. Eddy discovered the principle that governs the entire universe, including every detail of the human mind. This is the law of spirit, the only law of man and the universe.

Jesus said, "Come unto me all ye that labor and are heavy laden, and I will give you rest." and Christian Science is teaching the human race that the true way to come unto him is to live the life that he lived, to manifest that he manifested, and to demonstrate the truth that he taught. In this way it has helped many people to find rest, and peace, and health, they so earnestly desire.
